

# Gifting a green life - an initiative by FLEET

Impact Assessment – Environment

The impact of 10,000 trees planted by FLEET under the 'Rural Livelihood Support Model' in Punjab, Maharashtra and Rajasthan in India

## Oxygen production

**19,980,520 kgs**  
19,980 tonnes

## Carbon dioxide sequestration

**10,424,619 kgs**  
10,424 tonnes

## Total increase in groundwater depth

**55.15 feet**

The above data corresponds to 10,000 trees planted under the 'Rural Livelihood Support Model' in Punjab, Maharashtra and Rajasthan, considering the average lifespan of a fruit bearing tree is 20 years.
